- Adjusts to all body sizes and types
- Can be used on any flat surface

**bodyCushion™ -
an inside look!**

Developed By A Professional.

The bodyCushion™ was developed by a massage practitioner to maximize his clients' comfort. By its merits, the bodyCushion has made its way through the healing arts. It is used for soft tissue work, pregnancy relief and many other applications.

Optimizes Therapy.

The bodyCushion™ is therapeutic, affording decompression of joints and relaxation of muscles. It allows gravity to become a modality, enhancing a variety of treatments and thereby optimizing therapy outcomes.

How and Why It Works.

The key to the bodyCushion™ is the transition of support that its step-laminated design offers. Highest quality, CO2 expanded, Ultra Max foam allows for an amazing lifetime warranty. With the bodyCushion System the therapist has more control over treatment and increased access to the body.

A Proven Product.

The bodyCushion™ is used by leaders in massage and more than 100,000 professionals worldwide: Massage Therapists, Physical Therapists, Chiropractors, Rehabilitation Specialists and various other medical professionals.
